GANNDALF

NextGen Collaborative Cybercrime Investigation Framework

1st Newsletter

Building the EU's NextGen investigation framework against advanced forms of cyber threats and cyber-dependent crimes.

GANNDALF is an EU-funded Horizon Europe R&D project designed to empower Law Enforcement Agencies (LEAs) and the wider judicial ecosystem in detecting, investigating, and preventing advanced cybercrime. The project develops a secure, modular collaboration framework with privacy-aware data sharing, AI-powered decision support tools, and a customizable sandbox for collaborative investigation.

Beyond technology, GANNDALF promotes policy innovation, professional training, and citizen engagement through its Cyber Hygiene 2.0 approach, helping society recognise, report, and resist cyber threats more effectively.

Cybercrime Prevention & LEA Infrastructure Protection.

Financial, investment and data protection fraud. Cyber protection of public services.

Multi-Stakeholder Collaboration.

Data sharing between LEAs, prosecutors, and other stakeholders.

Cyber Hygiene 2.0.

Advanced training and awareness tools for professionals and citizens.

Tech Highlights

GANNDALF Portal, DSS and Sandbox

Unified interface for case management, tool deployment, and collaborative investigations.

Integrated SIEM

Tailored event monitoring and alerting system for cyberattack detection.

AI Scenario Builder

Uses LLMs and predictive analytics to auto-generate training and policy scenarios.

Crime Psychology Tools

Behavior analysis to support threat profiling.

Human-Swarm Teaming

Experimental multi-agent teaming

PETs

End-to-end encryption, data protection and PET recommendations for LEAs.

News and project updates

GANNDALF kicks-off

Oct 2024

Held in Warsaw on October 16-17, the event brought together our partners for the first face-to-face gathering, hosted by our partner, **Polish Platform for Homeland Security**.

Momentum across Europe and beyond

GANNDALF has been spotlighted at IEEE BigData 2024 and the European Police Congress. We have also joined the AI4Safe Europe Cluster to collectively address pressing challenges in the evolving cybercrime landscape. The project is engaging with EUROPOL's Innovation Lab, aligning with EU-wide efforts to harness AI, big data, and emerging technologies for more effective, collaborative, and future-ready policing across borders.

This project has received funding from the European Union's Horizon Europe research and innovation programme under the Grant Agreement No. 101167951. The website reflects only the view of the author(s) and the Commission is not responsible for any use that may be made of the information it contains.
